

# UNIVERSAL ROBOTS

2017.01.11

To whom it may concern;

It has been a pleasure to work with Marco Fornaro here at Universal Robots. He has been providing over the top initiative to get into the company, into Danish culture and into the different tasks he has been given. It has enabled him to autonomously solve the tasks he has been given and he has not been shy of putting in the extra effort needed to learn new areas. Even more Marco is a very easy person to work with which has given him a broad network within UR. I can only give Marco the highest recommendations.
